IMPACTS Streamer S210e

STREAMER S210e

Service • Support • Success

The IMPACTS S210e is the first 110V blaster with the In-Line Separation system. This means better separation of abrasive and dust as well as superior production over similar priced shotblast machines. Its compact design makes it ideal for residential contractors, small areas inherent on large projects, and where limited access work areas are in need of a profiled surface.

Recommended vacuum:
IMPACTS Dustcom 3003K
